Sample agenda: a four hour working session.

Up to 12 people · Two 2-hour tracks · Your own tools and data

Built for teams already using AI daily, on work that repeats

TRACK ONE Foundations

Asking to Directing · hours 1 and 2

0:00	Where the team is now. Current AI use mapped on the board, and the three places it breaks down.
0:20	Context that travels. Company and role context written once, with the folders and settings to match.
0:50	A structure the team reuses. Inputs named, output shape stated, judgement kept with the person.
1:20	Connect the stack. Two approved tools wired live, and what permissions each one gets.
1:45	First shared skill. Built together and saved where the whole team can run it.
YOURS	[FROM THE DISCOVERY CALL: the workflow this track should use as its example]

TRACK TWO Skills & Automations

Directing to Operating · hours 3 and 4

2:00	The 3x audit. Anything the team does or says three times goes on the list.
2:20	Pick the first three. Ranked by hours returned and what it costs to get wrong.
2:45	Build as a group. Skills and agents wired up, with the plugin library installed.
3:25	Guardrails. Read only to start, and a named reviewer on anything that sends.
3:45	What runs Monday. Owners, review dates, and the next two builds after this one.
YOURS	[FROM THE DISCOVERY CALL: the first automation this group wants standing up]

Do not distribute or reproduce

What exists when the room clears.

A shared skill, running

Built and tested on the team's own work, saved in the team's own accounts.

A ranked automation list

Everything the 3x audit surfaced, ordered by hours returned and risk.

Context files the team keeps

Company and role context, plus the folders and settings that match them.

Permission and review rules

What stays read only, what needs a person, and who approves a send.

CANDIDATES FOR THIS GROUP

Replace these with what came up on the discovery call.

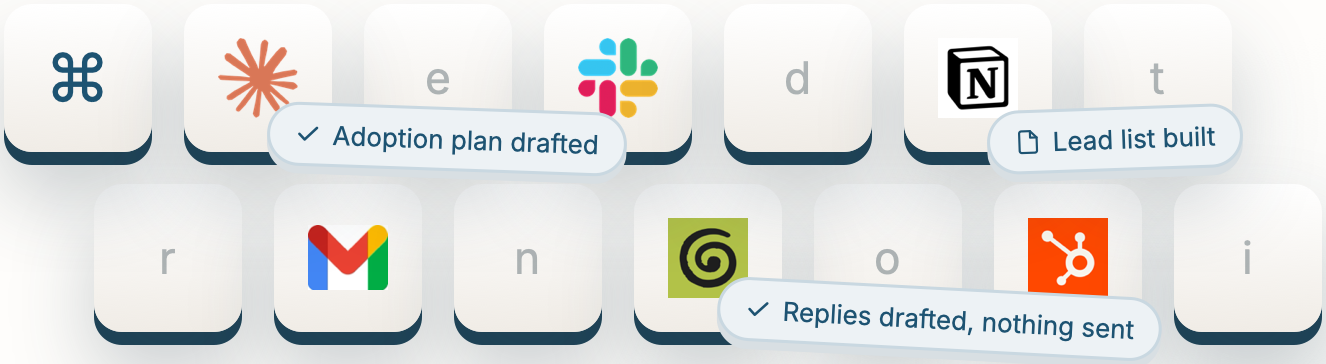

Build	Automate	Learn
[A shared prompt skill]	[The weekly reporting pull]	[Writing context files]
[A research brief generator]	[CRM enrichment before calls]	[Setting permission guardrails]
[Meeting notes to owned actions]	[Inbox triage and VIP drafts]	[Reviewing agent output]

AROUND THE SESSION

Before — A 30-minute call picks the workflow, confirms the stack, and settles what access is approved. Attendees get a one-page pre-read.

After — A written record of what was built and who owns it, then one virtual check-in within 30 days to fix what did not hold.

YOUR STACK, IN THE ROOM

INVESTMENT · STARTING AT **$6,000**

Packages are built around the group: how many people are in the room, and the problems they already have.

Ready when your team is.
